

NR 34

SYNTHETIC TURF BASEBALL SYSTEM

IN PARTNERSHIP WITH THE NOLAN RYAN GROUP

ACTGLOBAL™

A Partnership to Benefit Players, Communities and the Game of Baseball

Act Global and Nolan Ryan led RS3 have teamed up in a new partnership to forward the future of baseball turf technology and playability.

Founded on strong mutual goals and objectives for the baseball community, this new partnership begins the next generation of baseball surfaces offering optimal playing conditions. It gives athletes an excellent place to practice, play and perfect their skills.

We're excited about this partnership with Act Global.

Our mission has always been to promote the game of baseball to as many people as possible, and this partnership allows us to do that not only nationally, but internationally as well, with player safety at the forefront.

— Reese Ryan
Ryan Sanders Baseball CEO

RS3
TURF

When Act Global set out to create the **PERFECT PLAYING SURFACE FOR BASEBALL**, there was no better group to enlist than **NOLAN RYAN'S RS3** to help us achieve our goal.

Nolan Ryan has a proven track record as one of the greatest baseball players of all time.

- **27 MLB Seasons**
- **324 games won**
- **5,714 Career Strikeouts**
- **7 Career No-Hitters**
- **On 8 All-Star Teams**

Following in his footsteps, Act Global has invested in industry leading research and development to create a synthetic turf system that is specifically tested and optimized for the unique demands of baseball.

NR34

BASEBALL'S SYNTHETIC TURF SOLUTION

With installations in over 90 countries, Act Global's commitment to player safety and performance through extensive research, development, and testing has allowed us to become a leading turf provider for **NFL teams and D-1 colleges** across the country. In our partnership with Nolan Ryan's RS3, we sought to eliminate irregularities that can occur on other synthetic turf systems such as **slower ball pace, higher infill splash, and an unnatural ball bounce**. The product of that collaboration is a premier turf system designed and engineered specifically for the baseball diamond, **NR34!**

Natural grass benchmark testing has taken place at New York Yankees and Houston Astros spring training facilities.

Speak with our sales team today to start playing on the system approved by the Nolan Ryan Group!

SAFETY AND PERFORMANCE BENEFITS

-  SHOCK ABSORPTION
-  IMPACT
-  GROUND INTERACTION
-  TRACTION
-  STABILITY
-  BOUNCE
-  LOWER INFILL SPLASH
-  DURABILITY
-  UV TESTING

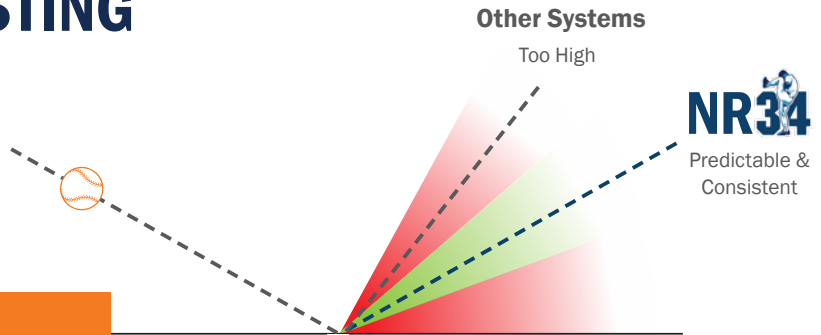

NR34 BASEBALL TESTING

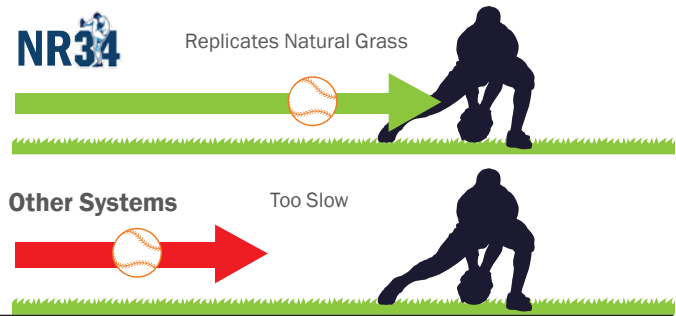

The NR34 system is perfectly designed to match the bounce and rebound characteristics of a natural baseball/softball field.

NATURAL BALL BOUNCE

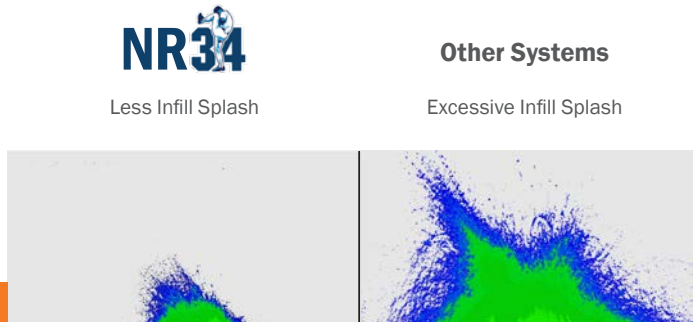

The speed of play is a major concern for players. Other synthetic turf baseball system's pace is much too slow. The NR34 gets it just right.

TRUER BALL PACE

The NR34 system's dense composition traps infill and locks it in place.

REDUCED INFILL SPLASH

Testing Institute Infill Splash Imaging
